Projects

GRIT Project 2016:

Multidisciplinary student program designed to stimulate creativity, entrepreneurship and collaboration. Together with 5 other students from different studies and universities, we worked together for 48 hours and designed a concept for the

new ACE incubator for the Amsterdam Centre for Entrepreneurship at Amsterdam Science Park which has been realised over the summer of 2016.

De Onderzoekers:

Worked together with students and professors from the VU and societal research institute Tertium to create a television programme pilot which can be found online. Practiced research, interview and presentation skills.

The Product is You:

Together with students and the communication department of the VU and Bas Heijne, we organised an event at the VU that made the attendees more aware of the role digital technology has in their lives.
